Humira Biosimilars Updates

Dear Provider,

Over the past few years, the FDA has approved a number of biosimilars for Humira (adalimumab). All biosimilars are FDA approved for the same indications as branded Humira. Humira will be removed from the First Choice Next formularies as of **9/1/2025**. The following Humira biosimilar medications will be available on the formulary at Tier 4 and require a prior authorization:

Proprietary Name	Non-proprietary name	Interchangeability with Humira
Abrilada	(adalimumab-afzb)	Y
adalimumab-aaty	(adalimumab-aaty)	Y
adalimumab-fkjp	(adalimumab-fkjp)	Y
Hadlima	(adalimumab-bwwd)	Y
Simlandi	(adalimumab-ryvk)	Y
Yusimry	(adalimumab-aqvh)	N

All biosimilars except Yusimry are interchangeable with Humira. All biosimilars require a new prescription in South Carolina.

Please assess and if clinically appropriate, consider the use of one of the above biosimilars in place of branded Humira for your patients in the future. If you have any questions, please reach out to Perform Rx General Assistance at **1-833-779-7229**.

Thank you,
